Yaber Pro V9 Projector

The Yaber Pro V9 will take your visual experience to the next level. It features a native 1920 x 1080P Full HD resolution and delivers an image with 500 ANSI lumens of brightness. In addition, it supports WiFi 6 for smooth, buffer-free viewing. It also offers exceptional picture quality and stereo sound thanks to built-in 5W x2 speakers. Besides, it guarantees versatility thanks to its support for multiple formats - you'll use it for watching movies, photos, playing games, etc.

Exceptional image quality

The Yaber Pro V9 offers images in native 1920 x 1080P Full HD resolution, which guarantees the clarity and detail of every frame displayed. LCD display technology and brightness of 500 ANSI lumens make projections vivid and clear. In turn, automatic keystone correction and autofocus make it easy to quickly and accurately adjust the image.

Reliable connectivity and hassle-free operation

With WiFi 6 support, the projector provides smooth playback without buffering or interference. The ability to connect to a smartphone via Bluetooth and support for iOS Cast and Miracast makes it easy to stream content from mobile devices.

Immersive sound

The built-in 5W x2 speakers deliver clear and deep stereo sound that perfectly complements the visual experience. This makes the Yaber Pro V9 ideal for watching movies or playing games.

Versatility and flexibility

The Yaber Pro V9 projector supports a wide range of video, audio and image formats, making it an extremely versatile device. It can be placed both on a desk and on the ceiling, allowing the device to adapt to different conditions and needs. In addition, the ports: HDMI x2, USB x2, 3.5mm headphone jack, AV allow you to connect various devices.
