Massage Gun Yunmai Prime 2 YMFG-M418 (Grey)

Yunmai Prime 2 massager YMFG-M418 (Gray).

Need relaxation after a long day at work or an intense workout? The Yunmai Prime 2 massager will be the perfect solution. There are 2 modes and 5 speed levels, so you can easily adjust its performance to your needs. The durable battery allows you to use the device for about 60 days, and charging is made easy with a USB-C port. The kit also includes interchangeable heads, a storage base and a carrying case.

5 speed settings

The Yunmai Prime 2 offers 5 speed settings - from 1800 to 3200 rpm carefully calibrated based on scientific research for optimal recovery benefits. With the click of a button, you can easily adjust the intensity of the massage to suit your needs, whether it's recovery after a workout or simply relaxing after a long day.

2 operating modes

Choose from available modes. Professional Percussion effectively relaxes muscles after exercise and relieves pain. At 1800 rpm it activates muscles, at 2400 rpm it provides relaxation, and at 3200 rpm it guarantees a professional massage. And the Intelligent Massage mode gradually increases the intensity of the pulsation - at level 1 it allows you to relax, and at level 2 it offers a deep massage.

Quiet, efficient operation

Equipped with an ultra-quiet brushless motor, the Yunmai Prime 2 provides up to 16 kg of pressure. It offers massage at a depth of 10 mm and at a maximum speed of 3,200 revolutions per minute, effectively relieving muscle fatigue and pain, resulting in effective body relaxation and faster recovery. What's more, the device operates at 45 dB, so you can relax without worrying about annoying noise.

Convenient storage of the set

The set includes a base that was specially designed for the Yunmai Prime 2. With its help you can conveniently store both the massager and the available heads. This way you can have the whole set in one place - it will always be ready for use.

Fast charging and long working time

Yunmai Prime 2 is equipped with a USB-C port for faster charging, convenience and compatibility with various devices. The built-in 2,600 mAh lithium battery has a long life - providing about 60 days of daily, 10-minute use on a full charge. In turn, during continuous use, the massager works for about 10 h.

4 heads

In the set you will find 4 heads, which you can use freely. The round head is suitable for massaging the back, thigh arms, calves or other larger muscle areas. Use the U-shaped head to massage the neck, both sides of the spine and the Achilles tendon. A spherical head, on the other hand, will work well for deep-tissue massage, i.e. joints, hands and feet. On the other hand, you will use the flat head for muscle shaping.

Included

massager
storage bag
base for the head and massager
USB-A to USB-C charging cable
round head
U-shaped head
spherical head
flat head
user manual

Manufacturer Yunmai
