Yunmai EasePro Massager YMFG-M406 (blue)

The Yunmai EasePro YMFG-M406 massager is an innovative device that provides relief and muscle recovery after intense exercise or a long day at work. Designed for athletes and physically active people, it offers 20 kg of pressure and 3 levels of speed, allowing you to customize its performance. Lightweight, quiet and extremely effective, it is ideal for anyone looking for professional muscle recovery.

A new level of massage

The EasePro YMFG-M406 massager uses a special technology that allows you to adjust the intensity of the massage with variable pressure. With a massage amplitude of 10 mm, the device precisely reaches tired muscles, offering deep relief and accelerating recovery.

Variable operating speeds

The Yunmai EasePro YMFG-M406 offers 3 massage speeds: 1800 / 2400 / 3000 rpm. These settings allow you to customize your massage from gentle muscle awakening, to post-workout relief, to intense recovery. Such flexibility makes the massager ideal for both professional athletes and recreational trainers.

Ergonomic design

The device features an ergonomic handle angle of 105°, which, combined with the aerodynamic design of the motion balance, ensures comfortable use and minimizes hand tremors.

Durable battery

Use the EasePro for long periods of time without recharging. The built-in 2600 mAh battery provides about 46 days of use (if you use the massager for 10 minutes a day). Charging, on the other hand, will be facilitated by the included USB-A to USB-C cable.

4 massage heads

The Yunmai EasePro YMFG-M406 massager comes with four different heads, each designed for a different muscle group. The round head is ideal for large muscle groups such as the back and shoulders, the U-shaped head is perfect for the neck and spine, the spherical head is designed for deep tissue massage, and the flat head offers a relaxing massage. This versatility ensures effectiveness in a variety of applications.

Ideal for everyday use

Weighing only 600 g and generating a noise level of 43 dB, the Yunmai EasePro YMFG-M406 massager is extremely portable. In addition, its transportation will be made easier for you by the included carrying bag. It is ideal for use at home, at the gym or in the office, offering a professional massage.
