Smart żarówka LED vintage Yeelight Filament

Ref: 0608887786873

Smart żarówka LED vintage Yeelight Filament

The Yeelight brand is part of the Xiaomi ecosystem.

Smart control begins here
The Yeelight Smart Dual Control Module is a relay module that in a smart way controls the activation of traditional electrical devices and light sources, turning them into smart devices.

Intelligent control at your fingertips
Powered by a WiFi/Bluetooth Dual Module, the Yeelight Smart Dual Control Module can turn traditional devices into smart ones and connect them to the network, allowing you to control them in many different ways - from the application, with a special remote control or by voice. The product is compatible with Amazon Alexa, Google Home and Samsung SmartThings. Note: before pairing the module with Amazon Alexa or Google Home, you need to connect it with the Yeelight app.

Remote clock control and reduced power consumption
When you are at work, do you want to run the ventilation system for an hour a day to keep the air inside the house fresh without incurring high electricity bills? The Yeelight Smart Dual Control Module will make this possible by running the remote clock control application. You can use it anywhere and anytime.

Compact design for easy configuration
The compact size allows the Smart Dual Control Module to be placed inside a switch box or connected to a control panel or ceiling lamp installation site without changing existing sockets and connectors. This makes the configuration of the Yeelight relay module extremely simple.

High quality materials
The Smart Dual Control Module has been constructed with a fire resistant PVC0 coating to ensure safe and reliable operation. You will successfully use it in every room thanks to its universal design.
