Inteligentna żarówka Yeelight W1 GU10 (ściemnialna)

The Yeelight brand is part of the Xiaomi ecosystem.

Yeelight GU10 Dimmable - smart, energy-saving light bulb

The Yeelight GU10 dimmable smart bulb will not only fantastically illuminate the rooms in your home, but also allow you to adjust the brightness of the light. It is extremely easy to install, and its remote control and grouping capabilities make it even easier and more enjoyable to use. The device is also energy efficient - in standby mode it consumes only 0.23W. Using it, therefore, you do not have to worry about high electricity bills.

Adjust the brightness of the light

One of the most important functions of the bulb is to adjust the brightness of the light it generates. Using this possibility, you can easily adjust the lighting to your tastes, needs or to a special occasion. Set a very bright light when you need a moment to focus - for example, while working or studying. Prefer to relax and unwind? Opt for a soft glow that promotes tranquility.

Remote lighting control

Add the bulb to the Yeelight app to gain remote control over it. Once you do, you'll gain the ability to turn the light on and off with your smartphone, adjust brightness, set schedules or create scenes. The product is also compatible with Google Assistant, Amazon Alexa and Samsung SmartThings, so your smart assistant can also help you operate it.

Group light bulbs to enjoy even more convenient control
Did you know that you don't have to control each bulb individually? If you want, take advantage of the ability to group devices to operate any number of them simultaneously. The light distribution angle of GU10 dimmable is 36°, so it is worth, for example, installing several of them in the living room or bedroom, and then group them and freely adjust their operation according to the occasion. In this way, you will make the rooms in your house illuminated exactly the way you want.

You will install it without any problems
Despite its great capabilities, the device is extremely easy to use. Its installation also does not cause any major problems. All you have to do is screw in the bulb, then connect it to Wi-Fi and configure it in a few simple steps - the Yeelight app will guide you through the entire process. You are only a few moments away from convenient control of your smart lighting.

Save electricity and money
The energy-efficient GU10 dimmable bulb is environmentally friendly and cheap to use. In standby mode, it doesn't consume much current, and its maximum power is only 4.8W. This means that by using it, you don't have to worry about high bills. GU10 dimmable will not only give you the lighting of your dreams, but also save electricity and money!
