Yeelight Ultra-thin Motion Sensor Closet Light A30

Ref: 6924922243724

Yeelight Ultra-thin Motion Sensor Closet Light A30

The Yeelight A30 Motion Sensor Closet Light is perfect for many applications. For example, you can mount it in a closet, by the stairs, in the kitchen or in the car to provide a reliable source of light for any occasion. It is very easy to install, and thanks to its 1100 mAh battery, it stands out for its long runtime. The device also provides a color temperature of 4000K, and allows you to freely adjust the brightness.

Choose from the available operating modes

The lamp supports two modes of operation - On and Auto. The first allows you to turn it on and off manually at any time. While the second allows it to work automatically - the device will spontaneously turn on the light when it detects motion. The range of the built-in sensor is about 33 cm, so you can be sure the A30 will work only when you really need it.

Optimum illumination in any situation

The lamp generates eye-friendly lighting with a wide 90° angle of incidence and a neutral color temperature of 4000K. This makes it great for most situations. You can also freely adjust the brightness of the light to suit your current needs. Ensure your dream comfort under any circumstances!

Long working time

Don't be afraid of having to charge the light frequently. The device is equipped with a powerful 1100 mAh battery, which provides up to 33 hours of continuous use or about 6 months of operation in Auto mode (assuming it will turn on 3 times a day at the highest brightness level). So you can use it for a really long time!

Easy installation

Mounting the light will not cause you any problem. The built-in magnet allows you to quickly and stably attach it to any metal surface. Do you want to use it in another place, for example, in a wooden cabinet? In this case, just use the dedicated adhesive plates! An additional advantage of the lamp is its thin design - its thickness is only about 0.7 cm. This means that it will be almost invisible under the cabinets and will not affect the interior design!

Many applications

Lamp A30 will prove useful not only in the cabinet. You will successfully use it, for example, as a trunk light in the car. You can also mount it in the kitchen to provide an additional source of light while cooking. It will also be a good idea to attach it near the stairs or bed to light your way at night when you go to the bathroom or to the child's room.
