Ottocast N91-C CarPlay Clip Adapter

The Ottocast N91-C CarPlay Clip adapter transforms a standard CarPlay system into a wireless solution while providing a number of innovative features. With a stable, lag-free connection in the 5 GHz band, you can use applications comfortably. The device offers an easy-to-read 1.6-inch screen that displays photos and album art, and also functions as a digital clock. A built-in fragrance diffuser with replaceable pads keeps your car interior fresh for up to 30 days. The product is compatible with 99% of vehicle models, and thanks to Plug & Play, you will have no trouble installing it.

Full freedom

Ottocast N91-C turns a wired CarPlay system into a wireless one, eliminating the need for cables. Thanks to 5 GHz technology, the connection is fast, stable and lag-free. Now you can focus on driving while enjoying your favorite apps on your phone and providing your passengers with an entertainment source.

Easy-to-read screen

Personalize the look of the easy-to-read 1.6-inch display by selecting your favorite photos, music album artwork or digital clock. The OttoPilot app allows you to easily customize the look and functions of your device.

Freshness while traveling

The Ottocast device not only facilitates access to CarPlay, but also takes care of the pleasant atmosphere in the car. The built-in fragrance diffuser with replaceable pads provides freshness for up to 30 days. Thanks to the rotating handle (360°), the fragrance is evenly distributed.

Efficient installation

Installing the Ottocast N91-C won't be a challenge for you - just plug the adapter into a USB port and turn on Bluetooth and Wi-Fi on your phone for the device to automatically pair. Plug & Play support eliminates the need for complicated configurations.

Stay up to date

The device supports OTA updates, so you can download the latest software via the OttoPilot app. You can rest assured that the adapter will always work efficiently, providing access to the latest features and improvements.

Compatible with any vehicle

The product is compatible with 99% of car models - from sedans to SUVs and luxury cars. Its ability to work in extreme conditions (from -20°C to 75°C) makes it reliable both on cold winter mornings and hot summer days.
