TWS Transformers TF-T13 earphones (black)

The TWS Transformers TF-T13 earphones were created for users who appreciate not only excellent sound quality, but also unique design. The Bluetooth 5.4 technology they use ensures a stable connection without lag, which is especially important for those who frequently watch movies and play games. Dual 16.2mm drivers guarantee Hi-Fi quality sound - as a result, every piece of music sounds clear and dynamic.

Hi-Fi quality

Dual 16.2mm drivers make the sound full and rich in detail. Whether you're listening to your favorite music, watching a movie or playing games, the sound quality remains top-notch.

Everyday comfort

Open earcups, which do not completely close the ear canal, allow for better air circulation. The solution used reduces the feeling of discomfort that often occurs when wearing traditional in-ear earphones for long periods of time. The soft silicone ear hooks are flexible and adapt to the shape of the ear, ensuring stability even during intense exercise.

Stable connection

Bluetooth 5.4 technology ensures a stable connection and reduces latency, which is sure to be appreciated by those who expect audio and video to be synchronized without any interruptions or interference. After initial pairing, the connection is automatic.

Ready for long music sessions

Long-term use of the earphones does not have to involve frequent charging. The TF-T13 earphones offer up to 6 hours of continuous playback on a single charge, and the charging case included in the set extends the operating time up to 60 hours. So you can enjoy your favorite music all week long. The USB-C fast charging feature allows the case to fully renew its energy in just 1.5 hours.

Safety during activity

Thanks to its open design, the TF-T13 earphones allow you to listen to music and remain aware of ambient sounds at the same time, which is especially important during outdoor activities such as running or cycling. Now you're sure to hear approaching vehicles and other potential hazards.

Everything under control

You don't have to reach for your phone to manage the operation of your earphones. The touch panels allow you to manage the music player, phone calls, activate voice assistants and change the operating mode.
