Ref: 6974706560004

Yunmai Pro Massager

Say goodbye to muscle stiffness, pain and soreness. The Yunmai Pro massager will give you the relaxation you've been dreaming of and speed up your post-workout recovery. It offers up to 3 speeds to choose from and is equipped with a powerful brushless motor. It also comes with 4 massage heads, which can be used in various situations. The durable battery allows you to use the device for up to 14 days on a single charge. Just 10 minutes of massage after workout is enough to effectively eliminate pain and fatigue!

3 speeds to choose from

How does the Yunmai Pro work? High-frequency vibrations penetrate deep into your muscles to provide you with relaxation, eliminate stiffness and reduce pain. Want to optimally adjust the massager's action to suit your needs? Choose from 3 available speeds! 1800rpm to activate your muscles, 2400rpm to relax your fascia, and 3200rpm for a deep massage. The decision is yours!

4 massage heads included

The set includes 4 interchangeable massage heads. They are made of skin-friendly, pleasant-to-touch silicone and are perfect for many applications. The round one is perfect for massaging the back, shoulders, thighs and other large muscle groups. The flat one allows you to relax and shape different parts of your body. The bullet-shaped head is suitable for deep tissue, such as the hands. The U-shaped tip will work well for massaging the neck, Achilles tendons and both sides of the spine.

High-performance engine

What makes the Pro massager stand out as so effective? The device is equipped with a brushless, dual-bearing motor that enables deep muscle stimulation of up to 12mm. Intense high-frequency shocks can quickly neutralize lactic acid, reducing the risk of soreness after a workout. Now you can exercise without worry and enjoy faster recovery! The massager also works surprisingly quietly - its volume level is about 45dB.

Effective, 10-minute massage

No longer do you have to worry that massaging one area of your body for too long will cause muscle or even bone damage. With the Yunmai Pro, 10 minutes is enough! You don't even have to keep track of the time. The massager will do it for you! The device is equipped with an intelligent timer that automatically stops working after 10 minutes of continuous operation. So you can enjoy not only an effective massage, but also the safety of use!

Durable battery

No longer do you have to be limited by cables and available outlets. The Yunmai Pro Cordless Massager will give you the freedom you dream of! With a durable 2600mAh battery, a fully charged device will run for up to 14 hours if you choose the first speed, up to 10 hours if you choose the second, or up to 9 hours if you choose the third. This means that with normal daily use, you can use the massager for up to 14 days!

Improved design

Despite its huge capabilities, the massager is distinguished by its small size and ergonomic design. Comfortable handle perfectly fits in your hand and does not slip out. The device is also extremely light - weighs just 1kg. You can easily operate it with just one button. Transport and storage of the massager is easy in the included carrying case. Pro looks very elegant and modern at the same time.
