Orico 2139 HDD/SSD 2.5" drive enclosure, 5Gbps, USB-A to USB Micro-B (transparent)

Orico 2139 2.5" HDD/SSD Drive Enclosure, 5Gbps, USB-A to USB Micro-B (Clear)

Stylish and portable, the Orico 2139 hard drive enclosure is designed for secure and convenient data storage. Made of durable materials, it is perfect for 2.5-inch SATA interface hard drives, providing rugged protection, 5Gbps transfer speed and 6TB capacity. Its compact design makes it ideal for both work and everyday use, allowing easy storage and transportation of data.

For the security of your data

The Orico 2139 drive enclosure is the perfect solution for those looking for durable and functional protection for their hard drives or SSDs. Made of high-quality PC material, the enclosure is characterized by exceptional flexibility and transparency, which ensures not only better shock protection, but also long-lasting durability. Its precision craftsmanship and sealed connections guarantee trouble-free data reading, offering additional protection for your files.

Ease of use and impressive capacity

The Orico 2139 is compatible with 2.5-inch hard drives and SSDs up to 9.5mm thick, with a SATA interface. Thanks to its tool-less design, drive installation and removal is quick and easy, allowing the internal SATA drive to be easily transformed into an external hard drive. The enclosure supports drives up to 6TB, making it ideal for storing large amounts of data without the need to install additional controllers.

Wide compatibility and modern design

Thanks to its wide compatibility, the Orico 2139 enclosure can be used with a variety of devices, such as TVs, game consoles and routers. Its transparent design not only adds elegance, but also allows users to view the drive's operating status. This solution is ideal for users who value both aesthetics and functionality, providing convenience and security of data storage in any situation.
