1MORE SonoFlow Pro HQ51 Wireless Headphones, ANC (blue)

1MORE SonoFlow Pro HQ51 Wireless Headphones, ANC (blue).

Focus on your favorite music. The 1MORE SonoFlow Pro wireless headphones feature ANC technology that reduces noise by 42 dB. What's more, the 40-millimeter dynamic drivers deliver high-quality Hi-Res sound. AI intelligent noise cancellation, on the other hand, allows you to talk freely on the phone. You can also customize the sound with 12 EQ presets available in the 1MORE Music app.

Hi-Res certified sound

Enjoy lossless signal transmission with the 1MORE SonoFlow Pro. The headphones provide HiFi sound and use the LDAC codec, which brings transmission speeds up to 990 kbps - 3 times faster than AAC and SBC codecs. What's more, the 40mm dynamic drivers provide excellent sound reproduction with superbly balanced highs and lows. In turn, the frequency response of up to 40 Hz is responsible for a wide resolution sound.

Ergonomic design

Use the headphones for long periods of time without feeling uncomfortable. The ultra-lightweight (246 g) design combined with soft ear cups ensures comfort. What's more, you can adjust the length of the headband and the position of the ear cups to maximize the customization of the SonoFlow Pro.

Hybrid noise cancellation

The headphones use QuietMax's advanced dual-hybrid noise cancellation algorithm, which mutes outside sounds by 42 dB. You can also choose from 3 available headphone modes. Noise Cancellation will work well in noisy environments, such as an airport, while Transparency will allow you to stay in touch with your surroundings. Normal, on the other hand, will come in handy in places with less noise, such as the library or at home.

Up to 100 h of playback

The headphones run for about 100 h on a single charge with the ANC function turned off, or 65 h when you turn it on. What's more, a 5 min charge allows for about 10 h of playback, and a full charge of the headphones will last about 80 min. You can also use the headphones wired by connecting them to a compatible device using the included 3.5mm jack cable.

Conveniently talk on the phone

Talk to your loved ones freely without worrying about background noise. The SonoFlow Pro use a high-quality microphone and AI algorithm that automatically eliminates noise when your voice is detected. As a result, you can rest assured that your caller will hear you loud and clear.
