Oneodio A71M Wired Headphones (Black)

The Oneodio A71M headphones are a model designed for DJs and music lovers who demand excellent sound quality. Equipped with 40mm drivers, they offer a wide frequency response from 20 Hz to 40 kHz, allowing for accurate reproduction of both deep bass and clear treble. In addition, the headphones are compatible with a wide range of devices, from smartphones to professional mixers.

High-quality sound

With 40-millimeter drivers and a wide frequency range, the Oneodio A71M headphones offer rich, dynamic sound with clearly emphasized bass and clear highs. They are ideal for mixing, as well as for everyday music listening. The A71M headphones are distinguished by their solid workmanship and reliability that professionals expect, while being versatile enough to meet the needs of any user.

Thoughtful design and comfort

The Oneodio A71M are distinguished by their foldable, portable design, which makes them easy to transport and store. The swivel ear cups and adjustable headband allow for a perfect fit to the shape of the head, ensuring comfort even during long listening sessions. The soft earcups effectively dampen external noise thanks to their closed design, allowing you to focus on the sound without ambient distractions.

Functionality and comfort

The A71M headphones feature a microphone mute button and adjustable microphone, making them an ideal choice for conversations or recording sessions. The ability to connect two pairs of headphones at the same time or connect two different devices, such as a smartphone and a mixer, provides versatility of use. The 6.35mm and 3.5mm connectors make the headphones compatible with a wide range of devices, from electric guitars to tablets.
