

Waterproof glowing dog collar with QR passport WAUDOG 40 mm

Waterproof glowing dog collar with QR passport WAUDOG 40 mm wide, 46-70 cm long

Ref: 4823089360331

Waterproof luminescent dog collar with QR passport WAUDOG 40 mm wide, 46-70 cm long.

WAUDOG collar is made of durable COLLARTEX material, which translates into its durability against wear and tear. Moreover, it effectively repels water and is easy to clean. Moreover, the smart address tag with QR passport allows you to identify your dog when it gets lost. In addition, the collar glows in the dark, so you can walk with your pet safely after dark.

Refined design

The collar is made of a material developed by COLLAR, which guarantees its durability and long-lasting use. COLLARTEX is resistant to stretching and mechanical damage, which makes the collar able to withstand heavy loads, even with very active dogs. In addition, the plastic fastex buckle and durable hardware ensure sturdiness and reliability with every fastening, and the bright color resists fading.

Smart address tag with QR passport

The QR Passport is a practical solution that helps identify your pet in case it gets lost. Once registered on the website animal-id.net, the QR passport becomes activated, allowing access to the dog's online profile. It contains key information, such as owner contact information and medical records. In a situation where someone finds your pet, simply scan the QR code to contact the owner immediately. What's more, the owner receives an email notification with the GPS location of where the code was scanned.
