

X-Sense CO03D Carbon Monoxide Detector

X-Sense CO03D Carbon Monoxide Detector

Ref: 5906168434877

X-Sense CO03D carbon monoxide detector

The X-Sense CO03D provides the highest level of protection against the silent killer that is carbon monoxide. Using Figaro's advanced electrochemical sensor, the device monitors CO concentrations from 30 to 999 ppm, alerting you to the danger at an early stage. The high-precision sensor not only detects even minimal concentrations, but also provides continuous monitoring, allowing quick response to potential danger.

Warning function and LCD display

The device has a clear LCD display that shows the CO level in the room in real time, so you always know what situation you are in. The color LED indicators (green, yellow, red) provide information about the operating status, low battery level and alarm mode. What's more, with its clear light and sound signals (≥ 85 dB), the sensor provides instant warning that you won't miss even while you sleep. This is especially important because carbon monoxide is odorless and colorless, and effective detection can save the lives of you and your loved ones.

Power supply and replaceable batteries

The X-Sense CO03D detector is powered by three replaceable AA alkaline batteries for easy maintenance and replacement without having to buy a new unit. A low-battery warning feature ensures you'll never miss the moment to replace them, guaranteeing consistent

sensor performance for years to come.

Alarms tailored to CO concentration levels.

The X-Sense CO03D responds to different levels of carbon monoxide concentration at different times, which minimizes the risk of false alarms, but at the same time ensures that a real threat is signaled quickly enough. For a concentration of 30 ppm, the alarm will sound after 120 minutes, at 50 ppm after 60-90 minutes, while for a concentration of 300 ppm it will sound in just 3 minutes. This means that the device is sensitive enough to warn of danger long before critical levels are reached.

Test and mute function

The CO03D has a test and mute function, giving you full control of the device. The test can be performed regularly to make sure the sensor is working properly. The mute function, on the other hand, allows you to temporarily turn off the alarm, which can be helpful in case of a false alarm or when the CO level falls below a dangerous threshold.

Safety certifications and stylish design

The device meets the stringent EN 50291 and UL 2034 safety standards, confirming its reliability and compliance with international standards. It has also been approved by BSI and CE, guaranteeing the highest quality workmanship. With its compact and modern design, the sensor will fit perfectly into any interior without disturbing its aesthetics.

Included

CO sensor x1 Mounting bracket x1 Mounting screws x2 Mounting pins x2 1.5V AA alkaline batteries x3 Instruction manual x1

Manufacturer: X-sense
Model: CO03D
Safety standard: EN 50291, UL 2034
Sensor type: Electrochemical (Figaro)
Lifespan: 10 years
Power supply: 3 x 1.5 V AA alkaline batteries (replaceable)
Alarm level: ≥ 85 dB at 1 m
Operating temperature range: 4-38°C (40-100°F)
Operating humidity: 10%-85% RH (non-condensing)
Mute time: Approximately 9 minutes
Indicators: Red, green and yellow LEDs
Weight: 133 g
Dimensions: 110 x 110 x 37 mm

Preço:

€ 39.50
