X-Sense XS01-M Link+ Pro smoke detector

X-Sense XS01-M Link+ Pro Smoke Detector

The X-Sense XS01-M Link+ Pro Smoke Detector is an advanced device designed to provide the highest level of security in your home. Equipped with wireless connectivity technology, it allows you to connect up to 24 devices, creating a network that will alert you to threats in every corner of your home. Thanks to its compact size and modern features, it provides effective protection in small as well as larger rooms.

A network of connected alarms for greater security

The XS01-M Link+ Pro allows you to connect up to 24 devices into a single network, so that when one sensor detects smoke, all the alarms in the system are triggered. This is a particularly useful solution in larger buildings, where the rapid transmission of emergency information can save lives.

Powerful alarm with a volume of 85 dB

The device emits an 85 dB alarm that can be easily heard even from 3 meters away. The sound frequency has been optimized to be quickly recognizable in an emergency situation, giving you more time to react and leave the building if necessary.

Long life with no maintenance required

The XS01-M sensor is designed for 10 years of trouble-free operation, and its CR123A lithium battery will last up to 5 years without needing replacement. This means you don't have to worry about checking the battery status regularly - the device will notify you of low power levels on its own with a beep and notification on the app.

Easy installation and management

Thanks to its compact size and easy installation, the sensor can be installed virtually anywhere. All necessary mounting accessories are included, and the installation itself takes just a few minutes. The device operates at 868 MHz, which ensures a stable and reliable connection between the other sensors.

Certified safety standard

XS01-M meets the European safety standard EN 14604:2005+AC:2008, which confirms its reliability and effectiveness in detecting threats. This is a guarantee that the product has been thoroughly tested and meets the highest requirements for fire protection.

Included

alarm unit x 1 mounting bracket x 1 screws x 2 wall plugs x 2 dowel x 1 instruction manual x 1

Manufacturer X-Sense Model XS01-M Power supply Replaceable 3 V CR123A lithium battery Product lifetime 10 years Battery life 5 years Sensor type Photoelectric Safety standard EN 14604:2005+AC:2008 Operating temperature 40-100°F (4.4-37.8°C) Humidity during operation ≤ 85% relative humidity (non-condensing) Alarm volume ≥ 85 dB at 10 ft (3 m) @ 3.2 ± 0.3 kHz pulsed alarm Silence duration Approximately 9 minutes Operating frequency 868 MHz Maximum number of connected units 24 wireless units (compatible with X-Sense Link+ Pro and Link+ systems only)
