PowerLocus Universe Wireless Headphones (black)

PowerLocus Universe are wireless headphones that offer advanced noise cancellation, full, rich sound and top-notch comfort. Thanks to their 40-millimeter drivers, they provide fantastic sound quality, and their powerful battery guarantees about 60 hours of playback. They are also distinguished by fast and stable Bluetooth 5.3 connectivity, all of which makes PowerLocus Universe the perfect choice for any music lover!

Reliable noise reduction

Cut off the background noise and focus on your favorite podcast or music. The headphones offer hybrid noise cancellation to help you do just that! The active mode blocks up to 95% of outside noises, which is great for crowded places like the mall, train or supermarket. There's also a passive mode for comfortable listening to music without distractions, and a transparent mode so you can hear everything going on around you perfectly. This is ideal, for example, when traveling and announcements are important.

Hi-Fi Stereo with Enriched Bass Mode

The PowerLocus Universe headphones are equipped with 40-millimeter neodymium drivers that offer clear, crisp sound and excellent harmony. What's more, a dedicated bass enhancement button allows you to boost the power of the low frequencies for an even more interesting musical experience.

Reliable Bluetooth 5.3 connectivity

PowerLocus Universe use Bluetooth 5.3 technology, which guarantees a fast, stable and energy-efficient connection to a wide range of devices, from smartphones and tablets to laptops and consoles. Forget about delays and enjoy smooth transmission no matter what the situation!

Long runtime and fast charging

The headphones provide about 60 hours of wireless music playback, so they can serve you for a really long time. The Universe model also supports fast charging - you'll have it ready to go in no time. The battery is about to run out, and you want to continue listening to your favorite songs without any problems? Simply connect the headphones wired with the included cable!

Ergonomic design and durable materials

PowerLocus Universe are designed for long-lasting comfort. The soft foam cushions conform perfectly to the shape of your head, and the 90-degree rotating ear cups ensure comfort even when worn for hours. At the same time, the headphones are very durable, and their adjustable headband allows you to adjust them even better to your needs. In addition, the foldable design makes them easy to transport - perfect for traveling!
