Photography Gloves PGYTECH Master Size XL

Prepare for winter outdoor photography sessions and don't let low temperatures affect you. PGYTECH Master gloves will protect you from the cold - they utilize enhanced graphene heating technology. They also provide exceptional user comfort and allow for unrestricted use of touchscreen devices. They are also distinguished by their high durability and resistance to splashing.

Perfect for Challenging Conditions

With PGYTECH, freezing temperatures won't be a concern. Master series gloves use graphene heating technology and offer 3 temperature levels to choose from. They also have adjustable cuffs to protect against wind, a layer of 3M Thinsulate cotton, and a breathable Hipora insert. They are also resistant to splashing. All of this ensures excellent insulation against the cold, and they perform exceptionally well in challenging conditions - you can effectively use them in temperatures from -35°C to 0°C.

Convenient Operation of Essential Devices

PGYTECH Master is an excellent combination of effective cold protection and user comfort. They are equipped with a special finger cover that provides additional heating - if you wish, you can easily fold it back at any time to comfortably handle your necessary equipment. Using touchscreen devices will also not be a problem - the gloves have 3 fingers made of conductive microfiber. This allows you to easily use a tablet or smartphone! But that's not all. If necessary, you can also uncover three fingers at any time.

Even More Features

The gloves are equipped with an efficient 4000 mAh battery, which provides long-lasting heating. Thanks to it, they can also function as a power bank - now you can easily charge your smartphone in the field! You also have an additional pocket at your disposal, which is perfect for storing small items such as cables or coins. Also noteworthy is the special wrist strap, which makes it easy to carry the gloves and prevents them from being lost.
