

Cheerble E1+ smart dog and cat fountain/drinker

Ref: 6971883205100

Cheerble E1+ smart dog and cat fountain/drinker

Cheerble E1+ smart dog and cat water fountain/drinker.

Cheerble E1+ is a smart fountain that provides dogs and cats with constant access to fresh and clean water. It features a 2-liter capacity and a reliable filtration system, making it safe for pets' health. It also stands out for its wireless operation - it is equipped with a 5000 mAh battery. It also allows you to choose from two operating modes, so you can adjust it to your pet's needs.

Wireless operation

The Cheerble E1+ fountain can operate without being permanently connected to electricity. Its built-in high-capacity 5000 mAh battery allows it to operate wirelessly for long periods of time, so you can easily place it anywhere in your home. This way you don't have to worry about cables or access to an outlet!

Two water distribution modes

Cheerble E1+ offers two modes of operation to choose from. In smart mode, the fountain automatically starts the flow when the built-in PIR sensor detects the presence of your pet. This ensures a comfortable drinking experience anytime! The timer mode, on the other hand, allows water to be dispensed every 15 minutes for 20 seconds.

Triple filtration system

Your pet's health should be a priority. That's why the E1+ fountain is equipped with an advanced triple filtration system (mechanical, chemical and carbon), which effectively removes impurities and unpleasant odors. This makes the water clean, tasty and safe to drink for a long time! You also don't have to worry about forgetting to change the filter - a built-in indicator will remind you.

Large capacity

The Cheerble E1+ drinker is equipped with a 2-liter tank, which lasts for a very long time - without the need for frequent refilling. You can also easily control the water level - an easy-to-read indicator with a scale allows you to do so.

MagDrive™ technology - no pump in the tank

Cheerble E1+ uses MagDrive™ technology, which eliminates the need for a classic pump submerged in the water. As a result, the device has a simpler design and is easier to clean. The solution also reduces the risk of malfunction and makes the drinker quieter, which is ideal for noise-sensitive animals.

Improved design

The fountain was designed to be as easy to maintain as possible. The modular design and NatureFlow system allow for quick disassembly of all parts, making it significantly easier to clean the unit. In addition, the drinker was created from durable, pet-safe materials, such as stainless steel and ABS, and the charging cable designed for it is effectively protected against overbiting - your pet's teeth will not be intimidated by it!

Manufacturer: Cheerble
Model: CDY02
Capacity: 2 l
Battery capacity: 5000 mAh
Input: 5 V - 1 A
Operating temperature: From 5°C to 40°C
Material: ABS, stainless steel, SAND
Dimensions: 222 x 204 x 190 mm
Weight: 1 kg

Preço:

€ 52.00
