

BOBOVR S3 PRO Battery Relief Strap for Meta Quest 3 / Quest

BOBOVR S3 PRO Battery Relief Strap for Meta Quest 3 / Quest 3S

Ref: 6937267000372

BOBOVR S3 PRO battery relief strap for Meta Quest 3 / Quest 3S

The BOBOVR S3 PRO Battery Relieving Strap was created specifically for the Meta Quest 3 / Quest 3S goggles. Thanks to the use of innovative technologies, it provides not only comfort of use, but also extended operating time, making it the ideal solution for virtual reality enthusiasts who value comfort and performance.

Improved system for user convenience

BOBOVR S3 PRO is equipped with a system that provides maximum comfort. Thanks to the specially designed Honeycomb Pad, the strap fits perfectly to the head, allowing for prolonged use without discomfort. The refined design has eliminated pressure on the face - as a result, even long hours of sessions in VR are a pleasure. In addition, the flat structure of the back strap allows you to lie and sleep comfortably with the headset on, and the height of the overhead support is adjustable.

Reliable ventilation

An innovative ventilation system, inspired by the shape of an aircraft engine turbine, provides effective cooling. A built-in air conditioner with 100-degree speed adjustment maintains the optimal temperature, ensuring comfort during intense gameplay. The unit also does not generate annoying noise.

Impressive performance

BOBOVR's product uses the new B100 battery architecture, which separates the discharge module from the battery itself. As a result, discharge efficiency has been increased and the problem of overheating has been reduced. The 10,000 mAh battery offers twice the usable capacity of the B2 model with only a 28% increase in weight. Support for 20W fast charging allows for quick power renewal, while additional features such as a low battery reminder and an easy-to-read charge indicator make it easy to keep track of the battery's runtime.

Hassle-free battery replacement

The BOBOVR S3 PRO strap allows you to easily and quickly change the battery with one hand - even in the dark. This way you never have to interrupt your VR session to charge the device.
