Cheerble W1 interactive ball for dogs and cats

Cheerble W1 interactive ball for dogs and cats.

Provide your pet with great entertainment and encourage him to be active! With the Cheerble W1 smart ball, he is in no danger of getting bored - even when you are not at home. The toy automatically moves and runs away from your pet, stimulating him to hunt. A powerful 300 mAh battery guarantees a long run time, and several available modes allow you to adjust the operation of the device to your pet's needs and habits. The ball also has a special opening for treats or catnip, so you can take care of additional motivation for your pet to play.

Several modes to choose from

Cheerble W1 offers up to three interaction modes - Gentle, Normal and Active. So you can adjust the intensity of the entertainment to your pet's temperament! However, it doesn't stop there. An additional Intelligent Companion mode automatically alternates between play and rest phases, offering 10 minutes of activity and 30 minutes off. This ensures you that your pet has enough time to play and then rest.

Obstacle avoidance

The ball is equipped with an obstacle avoidance sensor to ensure safe and uninterrupted play. When the toy hits an object, it will automatically change direction. This way you don't have to worry about it getting stuck somewhere!

Many hours of fun

Going to work or a party? Be sure that your pet is not in danger of boredom! The ball is equipped with a 300 mAh rechargeable battery, which guarantees its long working time. Just about an hour of charging is enough for your pet to play for up to 8 hours!

Ready for any adventure

The IP67 rating makes the ball waterproof, allowing you to play in water as well. A sturdy casing protects the inside of the device, so your pet can use it both indoors and outdoors without worrying about damaging it.

Simple operation

No app is needed to use the ball. This makes the device extremely intuitive and easy to use. All you need is one button to start it and choose the play mode suitable for your pet!
