Precision Screwdriver Set JIMI Home JM-GNT80, 80pcs

Precision Screwdriver Set JIMI Home JM-GNT80, 80pcs

Looking for a versatile, functional screwdriver set that prioritizes versatility without sacrificing quality? The JIMI Home JM-GNT80 combines both of these qualities, designed to make you comfortable working with the widest range of items available.

Many possibilities

In the set you will find up to 72 tips, an adjustable handle and its 2 smaller versions, 2 types of tweezers and a functional case with magnetiser/demagnetiser and a container for screws. The tool can be used for a wide range of maintenance, DIY and repair work. The main, adjustable handle has 2 lengths to choose from, which, combined with the extremely thin structure of the tips, allows you to operate even with difficult access - for example, in narrow or deep openings.

High-quality materials

Durable, high-grade materials have been used in the production of all components to ensure user comfort and safety. The tips (except reverse cross, H2.5, H2.3, H2.0) are made from a special S2 steel alloy, which ensures a long service life. The handles are made from aluminium alloy and the tweezers from stainless steel. Bet on quality that allows you to work comfortably!

Magnetic stability

Thanks to magnetic adsorption, the bits sit firmly in the holder. This means you don't have to worry about the stability of the whole structure. What's more, there are buttons on the case that will push the bit panels out of their sockets and angle them for easier access. This is aided by the magnetiser and demagnetiser functions. User safety and keeping your tools and devices free from damage is an absolute priority for us!

Easy to carry

All parts of the set are placed in a special, magnetically closed case. Thanks to this, you can easily carry the screwdrivers without worrying about losing small parts. The case is made of ABS material which is easy to handle. Choose the JIMI Home JM-GNT80 for all your convenience needs!

Kit contains

72 bits: T20H / T15H / T10H / T9H / T8H*2 / T7H / T6H / H2.5*2 / H2.3 / H2.0 / R0 / R1 / R2 / PH2*2 / PH1*2 / PH0*2 / PH00 / PH000*2 / 0.8*2 / 1.2*2 / 1.6*2 / Reverse Cross / H1.0 / H1.5 / H2.0*2 / H3.0*2 / H4.0*2 / M4.0 / M3.0 / M2.0 / 4 / 3 / 2 / SL4.0 / SL3.0 / SL2.0 / SL1.5 / SL1.0 / T5 / T4 / T3 / T2 / T1 / 0.6*2 / Y0.7*2 / Y1.5 / Y2.0 / Y3.0*2 / 2.6*2 / 3.0 / SIM EJECT BIT / 1.8 / 2.0 / 2.3 / 2.7 / 3.0
