

Smart Wi-Fi switch Sonoff MINI R3

Smart Wi-Fi switch Sonoff MINI R3

Ref: 6920075776775

Sonoff MINI R3 Wi-Fi Smart Switch

Even more convenient and hassle-free operation of your smart devices? With the Sonoff MINI R3 switch it is possible! The product allows you to control the connected equipment using the eWeLink app or voice assistants such as Google Assistant, Amazon Alexa and Alice. It has received TÜV, FCC and CE certifications and has a maximum load of 16A and 3500W. What's more, when you pair the MINI R3 with the separately available S-MATE switch, you'll gain even more remote control options for your devices.

Pair it with the S-MATE switch

Forget about the most common smart home management problems. When you pair the MINI R3 with the S-MATE switch, you can control it locally, within a range of up to 50m, even when an Internet connection cannot be established - the eWeLink-Remote signal makes this possible. The S-MATE is powered by a CR2032 battery, so it does not require the use of a neutral (N) cable. So you can easily use it also in an "old-type" installation.

MINI R3 + S-MATE - what else should you know?

Installation of both switches is extremely simple. Install the S-MATE in the wall switch box - it is compatible with 1/2/3-key switches of various types. This allows you, for example, to switch devices on/off with one button and activate scenes in the eWeLink app with the others. Furthermore, it is possible to pair one S-MATE with several MINI R3s or vice versa. This way you can optimally adapt your smart

home to your needs.

Safety of use

Pose for the highest quality. The MINI R3 switch has received TÜV certificate and it also meets CE and FCC standards. This means that the device is fully compliant with international legal regulations. It ensures safety of use and will serve you well for a long time. Moreover, thanks to its well-thought-out design and the use of high-quality materials, the switch is extremely durable and resistant to wear.

Many remote control options

With the eWeLink app, you can remotely turn on and off devices paired with the switches - not only at home, but also at work or on vacation. You can also set work schedules and smart scenes. For example, you can make your fan switch on automatically when an additional sensor (sold separately) detects that the room temperature has exceeded a certain value. You can also group devices to control several of them simultaneously.

Voice control

Connected devices with switches can also be controlled by voice. The MINI R3 works with smart assistants like Google Assistant, Amazon Alexa and Alice. With just a few words, you can turn off the lights without moving from the comfort of your couch or chair! What's more, while the switch isn't compatible with Apple HomeKit, a Siri shortcut is available in the eWeLink app. So you can get help from this assistant as well!

Brand

Sonoff

Model

MINIR3

Input

100-240V ~50/60Hz 16A max.

Output

100-240V ~50/60Hz 16A max.
