

Smart controller Wi-Fi Sonoff iFan04-H

Smart controller Wi-Fi Sonoff iFan04-H

Ref: 6920075776751

Sonoff iFan04-H intelligent Wi-Fi controller

Now you can control your ceiling fan with light even more conveniently. The Sonoff iFan04-H intelligent controller allows you to remotely operate the device using an app or a special 433 MHz RF remote control. Create operating schedules, choose from 3 available fan speeds and share control with other family members. The product is also compatible with Google Assistant and Amazon Alexa voice assistants.

3 fan speed levels

Customize fan operation to your needs - with the Sonoff iFan04-H controller it becomes easier than ever before! The app and remote control allow you to quickly and conveniently choose from 3 available speeds. A sunny spring day? Or a hot summer afternoon? With Sonoff you can easily ensure optimal fan performance in any situation!

Remote control with app

When you pair your chosen device with the controller, you gain the ability to control it remotely using the eWeLink app. Simply reach for your smartphone to turn it on or off, change the fan speed or set a schedule for it. Now you can easily make your equipment automatically run at a set time! What's more, the fan status is synced with your phone in real time. This way you always know when it is on!

Share Control

This is not the end of the possibilities that the application provides. You can also use it to share your devices with other users - such as family members or friends. With just a few clicks, they too can remotely control the fan, check its status, create work schedules for it or adjust the speed. Full control is at your fingertips!

Remote control

The RM433 remote control will also allow you to conveniently operate the equipment paired with the controller. Using it, you can, for example, with a single click turn the light on or off, turn the fan on or off, or select one of the three available speed levels. The remote control also allows you to pair your devices simply and quickly. Just press and hold the corresponding button.

Voice control capability

Are you about to go to bed, but don't feel like getting out of bed to turn off the light? Or maybe you're sitting in a comfortable armchair and you want to turn on the fan, but you don't have a remote control or your phone handy? No problem! The iFan04-H controller is compatible with Google Assistant and Amazon Alexa smart assistants. So you can control it with voice commands. Simply issue the appropriate command to, for example, turn on the fan and adjust its speed!

Brand

Sonoff

Model

iFAN04-H

Input

100-240V AC 50/60Hz 5A

Material (housing)

PC V0

Certifications

CE, FCC, RoHS

Weight

125g

Dimensions

116x55x26mm

RF remote control

433.92MHz (not included)

Wi-Fi

IEEE 801.11 b/g/n 2.4GHz

Output

Fan: 100-240V AC 50/60Hz 2A; Lighting: 100-240V AC 50/60Hz 3A;
