

Waterproof handheld photo lamp Puluz with a remote control P

Ref: 5907489608473

Waterproof handheld photo lamp Puluz with a remote control P

Waterproof handheld photo light with remote control Puluz PU3550R

Make it easy for you to create fantastic photos. This handheld photo lamp by Puluz offers several light modes to choose from and features an OLED display that makes it much easier to use. The 1/4" threaded holes allow you to mount the accessory on a tripod, for example, and the durable rechargeable battery provides a runtime of up to 90 minutes. The product is also IPX8 waterproof. The kit also includes a small remote control, which allows you to conveniently operate the lamp from a distance.

5 modes - many possibilities

Adjust the lighting to your expectations and take the perfect shot. The Puluz PU3550R handheld flash allows you to choose from multiple modes and settings. M1 mode provides several lighting effects to suit different occasions, while M2 offers 7-color RGB effects. M3 lets you blend RGB colors, and M4 gives you even more lighting effects to help simulate scenarios of your choice. The M5 mode lets you adjust the color temperature from 3000-6000K.

Easy to use

The PU3550R lamp is extremely user-friendly. It is equipped with 5 stainless steel buttons that provide easy access to its functions. Using them, you can, for example, not only turn the device on or off, but also change its operation mode. The product also has a built-in OLED screen, which displays the most important information. Thanks to it you can, among others, check the battery level or the selected

mode.

Long runtime

Don't worry that the lamp will discharge too quickly and an unwanted charging interval will be necessary. The device is equipped with a durable 2000mAh battery that allows it to run for up to 90 minutes on a full charge. Its convenient charging is enabled by a USB-C port, which is further protected from dust and other contaminants with a special cover.

Waterproof and durable

Now you can create stunning shots even underwater or in the rain. The PU3550R is IPX8 waterproof, which means it can be safely submerged to a depth of up to 30m. The device is also extremely durable. It is made of solid materials such as ABS, which makes it resistant to damage. All this makes it perfect for use both in the studio and outdoors.

Remote control included

In the set you will find a small remote control, with which you can conveniently operate the lamp remotely. Among other things, it allows you to change the RGB modes and colors. What is more, the 1/4" threaded holes allow you to easily mount the product on a tripod. All this gives you a lot of additional possibilities. Set the lamp on a tripod, give it to a model or place it under water. You don't have to walk up to the device and press the buttons every time - just a few clicks on the remote control!
