Camping lamp Superfire T30, 600lm, USB

Ref: 6974760350139

Superfire T30 camping lamp

Looking for the perfect camping lamp for yourself? The Superfire T30 will be the perfect choice! The device can illuminate an area of up to 36m² and allows you to choose from 4 light modes. It also allows you to freely adjust the brightness. Its working time is up to 6.5 hours on a single charge, it can also act as a powerbank. The lamp is extremely handy and durable - it will prove useful in almost any situation.

Durable battery and powerbank function

The T30 lamp has been equipped with 2 durable batteries with total capacity of 4400mAh. Thanks to that, a fully charged lamp can work for up to 6.5 hours. Built-in micro USB port allows you to charge it not only with a charger, but also, for example, a powerbank or a laptop. A special indicator will inform you about the charging status. Using the lamp you can also charge another device - for example a phone.

Optimal lighting

For optimum illumination when camping or on the move. The T30 generates an even, eye-safe light that doesn't glare or flicker. It has a 360° angle and can illuminate an area of up to 36m² (depending on the mode selected). It is therefore ideal for reading a book, playing cards or watching a movie.

4 light modes

Adjust the lamp to your needs. The T30 is equipped with 46 high-quality LEDs and offers 4 light modes to choose from. These include White Light (white light with 6200K color temperature), Yellow Light (yellow light with 2800K color temperature), Warm Light (white and yellow light with 4900K color temperature) and Strobe. You can also freely adjust the brightness of the lighting.

Clever design

The T30 lamp has been made of high-quality PC, TPR and ABS materials, which makes it extremely durable and resistant to damage, as well as pleasant to the touch. You can also use it in several ways. The special handle allows you to carry it comfortably or hang it, for example, on a branch, and the hook allows you to attach it in a tent. You can also simply place it firmly on a flat surface.
