Deerma Electric Kettle with temperature control 1,7 L 1700 W

Ref: 6955578038327

Deerma SH90W electric kettle

Now you can easily prepare hot coffee, tea or powdered milk. Deerma SH90W electric kettle enables you to boil water quickly and also allows you to adjust the temperature in the range of 40-100°C. Its capacity is 1.7l. The device was made of health-friendly materials and ensures safe use. Moreover, integrated into the housing touch display makes it easy to use the kettle and provides information about the selected function and temperature in real time.

Controlled temperature

The SH90W kettle will help you prepare not only delicious coffee and tea, but also, for example, powdered milk for your baby or water with honey. The device allows you to adjust the temperature in the range of 40-100°C, so you can easily adjust its operation to your needs. Moreover, in the case of 40°C and 60°C the kettle will keep warm for about 4 hours, and in the case of 80°C and 90°C for about an hour.

Fast boiling - large capacity

Don't waste time waiting too long for water to boil. The kettle is equipped with the Strix thermostat and a high-quality heating element, thanks to which it can boil water in just about 6 minutes. What's more, its capacity is 1.7l, which means you can prepare up to 8 cups of your chosen beverage at one time. All this makes the SH90W kettle great even for large families - no one will have to wait long for their

coffee or tea.

Built-in LED touch screen

The body of the device is integrated with a practical HD LED touchscreen display. With its help you can conveniently operate the kettle. You will also find on it information about the selected function and water temperature in real time. Moreover, thanks to double thermal insulation, the surface of the device will not get too hot, so you don't have to worry about scalding.

Safety of use

Are you looking for a kettle that will serve you perfectly for a long time? The SH90W is the right choice! The device was designed in such a way as to ensure maximum safety of use. The kettle will automatically shut off if you lift it or it's is empty. It will also automatically stop working when the water is already boiling. So you don't have to worry about damaging it.

Carefully thought-out design

The interior of the kettle is made of 304 stainless steel, which is corrosion resistant and safe to use in contact with food - it meets RoHS standards. The large opening makes it easy to clean the device, and the ergonomic handle makes it comfortable to use. To open the SH90W lid, all you have to do is press a button. This is not only convenient, but also helps you avoid burns.
