Wireless earphones TWS EarFun Air Pro 2, ANC (black)

TWS EarFun Air Pro 2 Headphones

EarFun Air Pro 2 are TWS wireless headphones that support hybrid ANC noise cancellation and are equipped with 10mm drivers. They deliver fantastic sound quality and let you choose from several playback modes. Their operating time reaches up to 34 hours with the charging case. Bluetooth 5.2 ensures reliable signal transmission, and the built-in touch panels allow for convenient operation of the headphones.

High-quality sound

Discover your favorite songs in a new, better quality. The headphones are equipped with 10mm titanium composite dynamic drivers. This allows them to deliver clear, richly detailed sound, crisp highs and enhanced, deep bass. With EarFun, you'll find out just how good music can sound!

QuietSmart 2.0 hybrid ANC noise reduction

Tired of annoying noise? Air Pro 2 helps you forget about it! The headphones support QuietSmart 2.0 hybrid ANC noise cancellation, which cuts unwanted noise by up to 40dB. You can also comfortably listen to music when it's windy - Air Pro 2 automatically reduces wind noise. No more annoying noise!

3 playback modes

Customize the headphones to suit your needs. Air Pro 2 offers 3 playback modes to choose from. Normal mode lets you enjoy excellent sound quality with passive noise cancellation. In Noise Cancelling mode, the headphones filter out unwanted noises, allowing you to cut out the noise. Ambient Sound mode lets you listen to your music while hearing what's going on around you. So you won't miss an important announcement at the airport!

Talk on the phone

Now you can talk on the phone without any problems, even in noisy environments like supermarkets or buses. Your callers will hear you just fine! Each earphone is equipped with 3 microphones. Air Pro 2 also supports ENC and an advanced noise cancelling algorithm. This way they not only perfectly capture your voice, but also filter out unwanted background noise.

Up to 34 hours of music

Listen to music for as long as you like. With ANC noise cancellation turned off, Air Pro 2 can run for up to 7 hours. The included carrying case extends that time by about 27 hours. So in total you can listen to your favorite songs for up to 34 hours! The headphones also support fast charging. In just about 10 minutes, they will keep you going for another 2 hours. Moreover, the charging case can be charged both via USB-C and wirelessly.

Bluetooth 5.2

Opt for the freedom that wireless provides. Air Pro 2 uses modern Bluetooth 5.2 to deliver fast, stable and reliable transmission. They also use less power. What's more, each headphone connects to the device of your choice independently. So you can easily use them both at the same time or individually - just the left or just the right.

Tailored to your needs

Air Pro 2 earphones fit perfectly in your ears and provide unparalleled comfort. They come with interchangeable eartips in 3 sizes (S, M and L), so you can tailor them to your needs even better. The IPX5 waterproof rating means you can listen to your music on a workout or in the rain without worry. The headphones also detect if you have them in your ears and automatically stop or resume playback depending on that.

Touch control

With EarFun, everything you need is always at your fingertips. The Air Pro 2 are equipped with easy-to-use touch panels. No more having to reach for your phone every time! Now you only need a few taps, for example, to pause / resume playback, switch tracks, activate the voice assistant, answer the phone, end a call or even adjust the volume.
