Screwdriver Bit Set Hoto QWLS002

Looking for a practical set of bits to make your work at home and in the workshop easier? HOTO QWLS002 will meet your expectations! The set includes 10 popular bit models and each bit is made of high quality S2 steel and measures 25mm in length. The included silicone stand makes it easy to store and transport.

Superior quality

HOTO brand bits will serve you for a really long time. They are made of high-quality S2 steel and are distinguished by a hardness of 60 HRC. Moreover, their surface is coated with a layer of zinc phosphate, which makes them resistant to rust. All this makes the bits extremely durable and wear-resistant.

Essential workshop equipment

The set includes the most frequently used types of bits - PZ2, TW1, triangular 2.3, Phillips PH1 and PH2, Allen H3, H4 and H5, T25 and flat

SL5. They will serve for many different activities, such as DIY, repairing bicycles and toys or assembling furniture. Importantly, all the bits are magnetic and make it easier to attract and hold screws.

Base included

The bits have been placed in the stand, which is made of environmentally friendly silicone and is extremely durable and pleasant to the touch at the same time. It is made of environmentally friendly silicone and is extremely durable, while at the same time pleasant to the touch.

Set includes:

10x C6.3 x 25 mm bits (slotted SL5, Phillips PH1 / PH2, Allen H3 / H4 / H5, Torx T25, Pozidriv PZ2, Tri-point TW1, triangular 2.3)
