Projector BYINTEK K25 Smart LCD 4K Android OS

BYINTEK K25 Smart projector

The BYINTEK K25 Smart projector uses LCD display technology and provides excellent image quality in up to 4K. It allows vertical and corner keystone correction, and offers electronic zoom and electronic focus. It is compatible with Android 9.0 and supports WiFi-display technology, plus an array of ports allows you to connect the projector with multiple devices.

On the big screen

The BYINTEK K25 Basic projector's native resolution is Full HD 1920x1080 p, but the device allows you to display in up to 4K (using a cable). So you can enjoy high image quality and create a home theater for you and your loved ones. The maximum projection area reaches 300', and the electric focus and zoom ensure comfortable use.

For gamers and more

The BYINTEK K25 Smart is compatible with Android 9.0 and supports WiFi-display technology, making it perfect for movie buffs and gaming fans alike. After all, you can project your favorite game on the big screen, as well as enjoy Netflix, Prime Video, Youtube and many other apps.

Wide compatibility

The device is equipped with two HDMI ports and two USB 2.0 ports, and there are also AV and Mini Jack 3.5mm ports at your disposal. This makes the projector stand out for its wide compatibility and you will easily connect it to your computer, PS4 console, U drive and many other devices.

Easy operation

The projector has a practical knob with which you can easily perform vertical and corner trapezoidal correction, thus eliminating errors made when setting up the projector. Touch buttons that make it easy to manage the device's functions are also a plus, as well as the included remote control. The projector also has a 5W speaker.
