

Car Battery Charger Xparkle ABC01

Car Battery Charger Xparkle ABC01

Ref: 6930460007261

Xparkle ABC01 car charger

Car batteries are not reliable. Get peace of mind with the Xparkle ABC01 car battery charger, which will not only replenish your car's power source, but also improve its overall condition. The device features wide compatibility and a range of safety features, so you can be sure of safety - both yours and your equipment's.

Well thought-out design

The charger will come to your aid when the battery of your car refuses to work. It has a clear interface with a few buttons for starting the selected mode, such as the automatic 7-stage charging process. The design of the ABC01 is compact enough to find a place for it in your car.

Many possibilities

The device fulfills more than just the role of a supplementary power supply. It has five modes of operation. The Battery Repair mode deserves special attention as it is capable of improving the condition of the battery and prolonging its lifetime. You can also use the AGM mode - useful when the ambient temperature is below 5°C.

Wide compatibility

The charger is compatible with most batteries for cars, SUVs, motorcycles, trucks, lawnmowers, ATVs, boats, yachts and other land or water vehicles using lead-acid batteries. Automatically starts the charging process for any compatible battery.

A range of safety features

The unit incorporates a range of technologies to protect you and your equipment in real time. It uses spark, undervoltage, short-circuit, reverse polarity, overvoltage, overheat and overcurrent protection.
