Memory card SANDISK EXTREME microSDXC 64 GB 170/80 MB/s UHS-

SANDISK EXTREME microSDXC 64 GB 170/80 MB/s UHS-I U3 memory card

Enjoy lightning-fast data transfer with the SanDisk memory card. The product reads files at speeds of up to 170 MB/s and writes them at 80 MB/s. The 64GB capacity allows you to store more data, and the A2 performance class is responsible for faster application performance. In addition, you can record videos in 4K UHD and Full HD quality without unnecessary interruptions.

Reliable speed

The SanDisk memory card transfers data at speeds of up to 170 MB/s, so you don't have to wait long for your files to be transferred. What's more, optimization for application use positively affects the speed of applications, which translates into a greater user experience.

Full HD recordings

Another advantage of the GN6MA is the ability to record videos in Full HD resolution. The SanDisk memory card can hold up to 24 hours of video recordings. So you don't have to worry about running out of space for other files.

Rugged and compatible

GN6MA is distinguished by its rugged design. The memory card is resistant to shock, water and extreme temperatures, as well as X-rays. So you can take it on vacation without worrying about damage. What's more, it works with Android smartphones, action cameras and

drones.
