

Network cable tester Habotest HT812A RJ45/RJ14/RJ12/RJ9

Ref: 5907489609135

Network cable tester Habotest HT812A RJ45/RJ14/RJ12/RJ9

Habotest HT812A cable tester

With the help of the Habotest HT812A cable tester, you will successfully obtain information about the performance of cables with RJ11 and RJ45 connectors. You will easily check the performance values of telephone and network cables. The device features a compact, fold-out design. It draws power from 2 AAA batteries.

Multiple capabilities

The instrument provides the ability to test 8P/6P/4P/2P network cables and telephone cables - it has RJ45 and RJ11 ports. It offers 2 test modes - slow and fast. You will successfully verify cable shielding or confirm the presence of a short circuit.

Thoughtful design

The device is distinguished by its compact, folding design, which guarantees comfort of use and transportation. It offers both new and already set cables testing. Moreover, it has been equipped with a number of LEDs, which are responsible for clearly indicating the test results. The removable battery cover contributes to convenience when you need to replace the power supply.

The kit includes:

Cable tester
