Wireless earphones TWS EarFun Air S, ANC (black)

Ref: 6974173980169

TWS EarFun Air S headphones, ANC (black)

Discover your favorite tunes in a new way. Featuring 10mm composite drivers and the latest Qualcomm chip, the Earfun headphones deliver superior sound quality. Bluetooth 5.2 is responsible for fast and stable signal transmission, and low latency enhances the immersive experience. What's more, you can enjoy long battery life and fast charging.

The sound quality you deserve

Despite their compact design, the headphones deliver crystal clear, richly detailed sound. They are equipped with 10mm composite drivers, which, combined with aptX and AAC codecs, provide great sound quality.

Reliable connection

The headphones use the latest QCC3046 Soc chip from Qualcomm and Bluetooth version 5.2, so you can enjoy a reliable connection. What's more, the signal range is up to 15 meters. In addition, you will connect the headphones to 2 devices at the same time, for greater convenience of use. Meanwhile, the latency of 100 ms enhances the immersive experience during gameplay.

Hear what you want

Need to cut yourself off from the world for a while? Turn on ANC mode and listen to your favorite tunes without outside interference. The

noise cancellation technology effectively eliminates ambient noise so you can focus on listening to music, an audiobook or a podcast. However, if you prefer to stay in touch with your surroundings, use the Ambient Sound mode.

Talk on the phone without interference

Another advantage of the Air S is cVc technology, which mutes ambient noise for the duration of phone calls. Train station, airport, streetcar - now you can talk on the phone and be sure that your interlocutors will hear you.

Water resistant

Take your Earfun headphones with you on your workout. The Air S are IPX5 water resistant, making them perfect for exercising or walking in the rain. Now you can have your favorite music with you at all times!

More possibilities with the app

Download the Earfun Audio app from the Play store or App Store and use the full potential of Air S. Through the app, you can use the equalizer settings, enable the noise cancellation function, Ambient Sound mode, gain access to system updates, etc.

Long runtime

Enjoy your favorite music for longer. The headphones can last up to 5 h if you use the ANC function and up to 6 h when you turn it off. Plus, with the charging case, you gain a total of 30 h of playback. You'll find a USB-C cable included for easy charging. After about 2 h, the Air S will be ready to go again. What's more, the model also supports wireless charging.

Included

headphones

silicone caps in 4 sizes (XS/S/M/L)

USB-C cable

user manual

Manufacturer

Earfun

Model

TW201B

Color

black

Bluetooth version

5.2
