Wrist mount PGYTECH for DJI Osmo Pocket and sports cameras (

PGYTECH wrist mount - create even more interesting shots

Designed for the DJI OSMO Pocket and sports cameras, the PGYTECH wrist mount offers you even more recording options. With its help, you will safely and conveniently create impressive shots, for example, while performing tricks on a skateboard or riding a bike. Wide compatibility, the ability to rotate the mounting base by 360° and free adjustment of the recording angle make this mount, made of excellent quality materials, allow you to prepare videos fully in accordance with your vision.

Compatible with your camera

What sets the product apart is its remarkable compatibility. You can easily mount a wide variety of sports cameras on it. You'll quickly find that it will work perfectly with your device as well.

Free adjustment of the recording angle

Are you afraid that, using the mount, you have to reckon with recording from only one angle? Nothing could be further from the truth! The PGYTECH accessory gives you the ability to freely adjust the position of your camera, so you can always create a great, surprising shot.

Adjust the direction of filming

That's not all! You can also freely rotate the mounting base of the mount by 360°, which allows you to record from different directions and increase your creative possibilities. With PGYTECH, almost nothing limits you - you can film the way you want!

Irreplaceable combination of comfort and functionality

Made of excellent quality sponge, the pad combines functionality with comfort. Skin-friendly, flexible and breathable - it makes you comfortable to wear the grip even all day long. It's also anti-shock for even better recording quality.

Always in place

The wrist band is also made of breathable, skin-friendly and eco-friendly materials. It also prevents sweating. What's more, it's flexible enough to guarantee you full comfort, but also rigid enough to stay firmly in place. Its length is adjustable from 50-100 mm, so you can easily adjust it to your wrist.
