Havit KB393L 2-in-1 Gaming Kit Keyboard + Mouse

Win more battles with the KB393L from Havit. The set includes a keyboard and mouse that provide unparalleled comfort. In addition, thanks to the blue switches, the keyboard will perform well not only during gameplay, but also during typing. Both the mouse and the keyboard have colorful backlighting, allowing you to immerse yourself even more in the world of gameplay.

Thoughtful design

The Havit keyboard is equipped with blue switches, so the keys stand out with a slightly louder action and take a little longer to return to their initial position. Thus, they will work well not only during gameplay, but also during typing. What's more, the metal workmanship contributes to the longevity of the device.

User-friendly

Another advantage of the keyboard is its colorful backlighting. You can choose from 21 lighting effects, customizing its appearance to your liking. In addition, the function keys will allow you to quickly turn down the volume, enable mute, adjust the brightness of the computer screen, etc. And with the key rollover function, you are assured that every keystroke will be recorded. You can also lock the Windows key - nothing will interfere with your gameplay anymore.

Mouse with RGB backlighting

You'll also find an ergonomic mouse that allows you to use it for long periods of time without feeling uncomfortable. It offers adjustable resolution in the range: 800-1600-2400-3200-4000-4800 DPI, so it will work well in various situations. What's more, the color of the mouse's backlight will inform you about the selected DPI level. You can also choose between 7 backlight modes, or turn them off completely.
