

VGA Bracket Darkflash DL240 (black)

VGA Bracket Darkflash DL240 (black)

Ref: 4710343792079

Darkflash DL240 VGA graphics card holder

Darkflash DL240 is a practical mount for VGA graphics cards. Its magnetic base gives it stability and allows you to easily mount it in your computer case. Thanks to the adjustable brackets, you can easily adjust it to your needs, and the colorful ARGB backlighting gives it a unique character. It is also possible to synchronize the product with the motherboard.

Refined in every detail

The Darkflash DL240 mount will allow you to stably mount your VGA card in a computer case and protect it from damage. The sturdy magnetic base allows you to quickly mount the product without any additional tools. You will also find 2 brackets in the set, which are made of durable ABS. You can set them at any height, so you can easily adjust the bracket to your case and selected components.

Colorful backlighting

Do you like modern gaming-style devices? Or maybe you want to create an atmospheric gaming zone for yourself? The Darkflash DL240 mount will help you do it! The product is equipped with colorful ARGB backlighting - dynamic lighting effects are sure to appeal to many users. You can also synchronize it with your motherboard and other components for even more interesting visual effects.

Wide compatibility

Give your computer a modern touch. The Darkflash DL240 mount is compatible with ASUS, MSI, GIGABYTE and ASROCK motherboards. You'll find a cable that fits GIGABYTE components and a cable with a 5V/3Pin connector. So you can synchronize the backlight with your motherboard and control it conveniently. Note: the product is not compatible with 12V/4Pin ports.
