ENCHEN T501 sonic toothbrush (pink)

Take care of proper oral hygiene with Enchen. The T501 sonic toothbrush works at a frequency of 31,000 vibrations per minute and has soft, rounded bristles to effectively remove food debris and stains while not harming sensitive gums. It's fully water-resistant, which will make it easy to keep clean, and the durable battery ensures long runtime. What's more, you can customize its performance by choosing from 3 modes: Clean, Sensitive and Bright.

### Effectiveness

The Enchen T501 sonic toothbrush has a powerful motor that generates vibrations at a frequency of 31,000 rpm to effectively remove dirt and stains. Moreover, it has rounded, soft bristles that thoroughly but gently clean teeth. It will be perfect especially for sensitive gums. Enjoy a healthy, beautiful smile thanks to Enchen.

Customize its performance to suit your needs

The T501 offers 3 modes of operation to meet different user expectations. In addition, a color indicator will let you know which mode you have selected. Clean (white) provides thorough cleaning and will work well for everyday use. While Sensitive (blue) mode will be suitable for sensitive teeth and gums, and Bright (green) will help get rid of stains and polish your teeth.

#### Long working time

Take the T501 with you on vacation! The Enchen sonic toothbrush is equipped with a 180 mAh battery that provides up to 30 days of use on a single charge (if you use the toothbrush twice a day). In addition, a USB cable is included for easy charging - after about 1.5 hours the device will be ready to use again.

#### Thoughtful design

The Enchen sonic toothbrush is designed to make its use comfortable. It stands out for its lightweight (55 g) and ergonomic design, so you can use it comfortably. What's more, the built-in timer will briefly pause to remind you to change the brushed area (every 30 seconds) - so you don't have to keep track of the cleaning time - the T501 will do it for you. In addition, the device will remember the last mode you used. The product is also IPX7 water resistant, so you can clean it under running water.
