

## Set of 4 filters UV+CPL+ND4+ND8 Sunnylife for DJI Mini 3 Pro

Ref: 5907489609784

Set of 4 filters UV+CPL+ND4+ND8 Sunnylife for DJI Mini 3 Pro

Sunnylife set of 4 UV+CPL+ND4+ND8 filters for DJI Mini 3 Pro (MM3-FI418).

The set includes 4 UV+CPL+ND4+ND8 filters that will find use in a variety of conditions. Compatible with the DJI Mini 3 Pro camera, they will allow you to take full-color shots with proper light polarization. Create even more phenomenal shots!

### Convenient handling

The filters are designed for quick and hassle-free installation. Each one is adjustable, allowing you to achieve the desired polarization angle. You don't have to worry about damaging your equipment.

### Exceptional protection

Rugged construction ensures safe and comfortable operation in almost any conditions. The filters are characterized by resistance to scratches, oil, or water. Additional protection is provided to them by a special case.

### Light weight and professional glass

Optical glass used in production, makes the quality of your photos even better. Vibrant, undistorted colors - all this you will gain with UV+CPL+ND4+ND8! The filters are also characterized by light weight, so you don't have to worry about the load on your drone.

#### ND 4/8 filter

ND filters adjust the amount of incoming light, which allows the camera to set the right exposure. Additionally, they improve the color of your photos, making them more vivid and transparent. Also try the slow shutter speed and see how great the results can be. When you're working in bright sunlight, you can reduce the exposure time with an ND filter - you'll then get the right blur.

#### CPL filter

Usually used to eliminate harmful non-metallic reflective light and to increase color concentration. Enhances blue skies and cloud backlighting - make your photos more accurate and vivid. Mostly used for glass, water and underwater scenery photography.

#### UV filter

The filter helps reduce the blue and blue-gray tint caused by ultraviolet radiation. Not only will it take care of protecting your equipment, but it's also great for shooting open spaces such as seas or vast fields.

#### Manufacturer

Sunnylife

#### Weight

Approximately 0.9 g

#### Compatibility

Mini 3 Pro

#### Filters

UV+CPL+ND4+ND8

#### Quantity included

4
