

## Interactive Cat Ball Cheerble M1 (Grey)

Interactive Cat Ball Cheerble M1 (Grey)

Ref: 6971883206909

Cheerble M1 Interactive Cat Ball (Gray).

Keep your pet entertained. The Cheerble interactive ball moves spontaneously when your cat touches it. It is equipped with special protection against falling into the cracks found in the house. It has several modes, so you can adjust its operation to your pet's needs. You charge it with a USB cable, and after about 60 minutes it will be ready to work again. Finished with synthetic fiber, it is nice to the touch, and the LED backlight will further attract your cat's attention.

Easy to use

To get the ball ready for use, hold down the power button for 3 seconds. Then select the mode: Passive, Normal, Active, again holding down the power button. The LED backlight will indicate the selected mode in green, blue or red. Touch the ball or shake it to start working. Place the ball on the floor for your pet to play with it.

Thoughtful design

Carefully thought-out design is another advantage of the Cheerble ball. The toy works for 10 minutes and then turns off for 30 minutes, so your pet won't get bored so quickly. M1 is equipped with a special system that prevents the ball from falling into the gaps. In addition, its synthetic fiber finish is pleasant to the touch, and the LED backlighting will attract your cat's attention and encourage it to be active.
