

## Wireless Qi charger Nillkin Magic Cube (black)

Wireless Qi charger Nillkin Magic Cube (black)

Ref: 6902048152533

Nillkin Magic Cube Qi inductive wireless charger (black)

Enjoy fast wireless charging of your devices. The Magic Cube charger from Nillkin provides voltage up to 9V and stands out for its stable, reliable performance. It also guarantees safe use and supports the Qi standard. It automatically detects devices that support fast charging and adjusts its operation to them. With its help you can charge selected devices up to 40% faster than usual!

Fast charging

The charger is equipped with an improved copper coil, which ensures a more stable magnetic field and more efficient operation. The product also offers a high voltage of 9V, which has helped increase charging speed by up to 40%. It is also distinguished by a conversion rate of up to 80%, which means that its efficiency is comparable to ordinary wired solutions. Note: a QC 2.0 / 3.0 adapter is required to take advantage of fast charging capabilities.

Wide compatibility

Magic Cube also features wide compatibility - with its help you will charge, among others, iPhone 11, Samsung Galaxy Note 10, Huawei Mate 30, Xiaomi Mi 9, etc. in a short time. No more endless waiting until your smartphone is ready to work again! The charger is compatible with most devices that support the Qi standard. In addition, its electromagnetic induction range is up to 6mm, so you can easily charge your phone without removing it from the case.

#### Security

No more worries about the safety of the charger and the devices powered by it. Magic Cube is equipped with protection against short circuit, overvoltage, overcurrent and overheating, among others. What's more, it automatically starts fast charging when it detects a compatible device. It also spontaneously enters standby mode when it restores 100% power to the equipment. A smart chip is responsible for its efficient, stable operation.

#### Improved design

Environmentally friendly yet durable materials have been used to make the charger. Its transparent components have also undergone a reinforcement process, giving them increased scratch resistance. What's more, the surface around the induction area is non-slip, giving your smartphone even more stability. Information about the charging status will be provided by a special indicator.
