

## Sensor extension cable Sonoff RL560

Sensor extension cable Sonoff RL560

Ref: 6920075777796

Sensor extension cable Sonoff RL560

The Sensor extension cable Sonoff RL560 will allow you to install temperature and humidity sensors and take measurements wherever you want! The cable allows you to distance temperature and humidity sensors from Sonoff modules. The product works with dedicated Sonoff sensors - it fits Elite and Origin series devices, among others, and its length is 5 meters. It allows a maximum extension of 60 meters, which will give you unlimited freedom.

Fits a variety of models

The Sonoff extender is compatible with the DS18B20 temperature sensor, the M01 soil moisture sensor, as well as the THS01 temperature and humidity sensor. This makes it easy to connect the right device and place it in the location of your choice.

Get even more options

The length of the RL560 is as long as 5 meters, which will give you incredible freedom. However, that's not all! Increase your possibilities by linking together more extension cords up to a length of 60 meters. This solution will allow you to access even hard-to-reach places, so you can take measurements almost anywhere!

Manufacturer

Sonoff  
Model  
RL560  
Color  
Black  
Cable length  
5 m  
Maximum length  
60 m  
Insulation resistance  
min. 5M $\Omega$   
Conductor resistance  
max. 10 $\Omega$   
Interface  
RJ9 4P4C  
Compatible Sonoff sensors  
THS01, DS18B20, MS01
