

Hobotest HT108L Digital Universal Multimeter

Ref: 5907489609449

Hobotest HT108L Digital Universal Multimeter

Hobotest HT108L digital universal multimeter

Hobotest HT108L digital multimeter is a multifunctional device that will prove useful during electrical work. The product allows you to measure voltage, resistance and many other values. The multimeter has an easy-to-read display that allows you to conveniently read the measurement results, moreover, it is equipped with a flashlight and practical buttons.

Many useful functions

Hobotest HT108L digital universal multimeter is a handy device that surprises with the enormity of its capabilities. It allows you to measure with high precision, among other things, AC and DC voltage, resistance, continuity or capacitance. It also allows you to test diodes, and thanks to practical buttons you can efficiently select the appropriate function.

Well designed

The small size of the device (130 x 70 x 23 mm) makes the multimeter fit well in the hand and provides high comfort of use. It is powered by two AAA batteries, which you can easily remove and replace. The soft material housing is pleasant to the touch, plus it provides effective insulation and is drop-resistant.

Included

Digital universal multimeter

Test leads

User's manual

Manufacturer

Hobotest

Model

HT108L

DC voltage measurement range

200mV/2V/20V/200V/600V

AC voltage measurement range

20V/200V/600V

DC current measurement range

20mA/200mA

Resistance measurement range

200 Ω /2k Ω /20k Ω /200k Ω /2M Ω /20M Ω

Diode testing

Yes

Number of counts

2000

Data storage

Yes

True RMS value

Yes

Low battery indicator

Yes

Automatic power off

Yes

Backlighting

Yes

Power supply

2x 1.5V AAA battery

Safety

EN61010-2-030 EN61010-2-033 CAT III 600V

Weight

Approximately 105 g

Dimensions

128 x 67 x 36 mm

Preço:

€ 9.00
