Darkflash DK360 computer case

Create for yourself a computer that will perform not only at work, but also, for example, during dynamic gaming. The Darkflash DK360 case is compatible with a wide variety of components and is equipped with several key ports - including USB 3.0 and USB 2.0.

Original design

Do you want your computer to not only work great, but also look great? The DK360 case will be an excellent choice! Its side panel is made of tempered glass, and the front panel is distinguished by an interesting mesh structure. All this means that you can, for example, originally display selected components with RGB backlighting and get fantastic visual effects.

Huge possibilities

The case offers plenty of expansion possibilities, so you can easily create your dream computer. The DK360 allows you to mount 2 HDDs or 1 SSD, and is compatible with ATX, M-ATX and ITX motherboard standards. It also allows you to install a graphics card up to 350mm in length and a CPU cooler with a maximum height of 160mm.

Optimal cooling system

Play even the most demanding games and don't worry that your computer will overheat. The DK360 case allows you to create an optimal

cooling system - thanks to its improved design it dissipates heat efficiently. It also allows you to install up to 6 fans. What's more, you can install water cooling in its top, front or rear part.

Comfortable operation

Customize your computer to your needs and enjoy comfortable operation. The DK360 chassis is equipped with the most important ports and buttons that will make it easier for you to operate your finished equipment. Among other things, there is a USB3.0 port for instant file transfer. There are also 7 expansion card slots for you to expand your configuration exactly the way you want it.
