

## Computer Power Supply Aigo AK700 RGB (black)

Computer Power Supply Aigo AK700 RGB (black)

Ref: 6926170090181

### Aigo AK700 RGB computer power supply

Ensure a reliable power source for your computer. The Aigo AK700 power supply offers a rated power of 700W and is equipped with a quiet 12cm fan that guarantees it an uninterrupted supply of air. The product is also distinguished by its durability and stable, efficient operation. Also noteworthy is the colorful RGB backlighting, which allows for fantastic visual effects.

### Constant airflow

The power supply is equipped with a powerful 12-centimeter fan, which is responsible for its effective cooling. However, you don't have to worry about annoying noise. The intelligent temperature control circuit prolongs the life of the product and guarantees its quiet operation. So you can enjoy comfortable work in peace!

### Improved design

What makes the power supply perform so efficiently and stably? The product is equipped with a high-voltage electrolytic capacitor, and it also has an internal circuit board - all of which translates into its reliable operation. What's more, thanks to its well-thought-out design, the device supports the latest dual-core and quad-core processors from Intel, AMD and more.

### Impressive durability

Don't be afraid that the power supply will refuse to serve you too quickly - the device from Aigo is incredibly durable. It uses galvanized steel plates for its construction, which gives it exceptional durability and resistance to damage. The product has also been protected against short circuit, overcurrent, overvoltage, under-voltage and overload.

#### Many possibilities

Have confidence that the power supply will fit your hardware configuration. The AK700 is equipped with VGA 6+2 Pin cables, which means it can handle many of today's graphics cards. Effortlessly match it to your computer and provide it with a reliable power source!

#### Brand

Darkflash

#### Model

AK700

#### Maximum power

700W

#### Input voltage

200-240V

#### Input frequency range

50/60Hz

#### Dimensions

140x150x86mm

#### Cooling system

120mm, hydraulic bearing

#### MTBF

> 20,000h

#### Operating temperature

0-45°C

#### Output interface

M/B 20 + 4 Pin x1; CPU 4 + 4 Pin x2; PCI-E 6 + 2 Pin x1; SATA + SATA x2; 4 Pin x2;
