

Blackhead Remover with camera inFace CF-05E (black)

Ref: 6971308400868

Blackhead Remover with camera inFace CF-05E (black)

InFace Blackhead Remover with camera CF-05E (black)

Get rid of imperfections and restore your facial skin to a healthy appearance. The inFace vacuum effectively removes blackheads and whiteheads, and you can choose from 3 levels of intensity. The device offers a warm compress function and a blue light. It also has a built-in camera, and a dedicated app will allow you to track your progress. In addition, you will find 4 different suction nozzles in the kit.

Warm compress

The inFace product offers a warm compress function. To use it, remove the cover from the bottom of the vacuum and apply it to your face for 5-10 minutes. The temperature of 40°C will help open your pores and make it easier to get rid of blackheads. In addition, the treatment improves blood circulation, dilates capillaries and softens keratinized skin. This makes the removal of blackheads and whiteheads easier and does not cause irritation.

The power of blue light

If you struggle with acne and inflammation, the inFace vacuum will be a great solution for you. The device inhibits sebum secretion, has an antibacterial and anti-inflammatory effect. Blue light with a wavelength of 459 nm also stands out for its soothing effect and removes swelling. It also brings relief to the face after a blackhead removal treatment.

Customize the device's action to suit your needs

InFace Blackhead Remover with camera CF-05E offers 3 levels of suction to meet different skin needs. The lowest level is suitable for novice users and sensitive skin. It effectively cleanses the skin and removes excess oil. The medium level is dedicated to combination skin and will get rid of blackheads and whiteheads. The highest level, on the other hand, will work well for oily skin and will deal with particularly stubborn blackheads.

4 suction nozzles in the set

In the package you will find 4 suction nozzles - each for a different area of the face and skin type. The smaller head is designed for particularly stubborn mustaches, while the medium one is for hard-to-reach areas, such as the wings of the nose. The oval tip will be suitable for the T-zone and larger areas of the face. The silicone head, on the other hand, will work well for sensitive skin.

Watch the progress

That's not the end of the advantages of the InFace Blackhead Remover with camera CF-05E. The product connects wirelessly to a smartphone or tablet and provides a stable connection. It is compatible with Android and iOS systems. It has a built-in camera and allows you to create photos so you can track your progress. It magnifies the image by 20 times, so you can be sure that blackheads and whiteheads won't escape your attention. Plus, a timer will remind you to change the area every 3 seconds, so you can avoid irritation.

Thoughtful design

InFace Blackhead Remover with camera CF-05E is distinguished by its lightweight and compact design, so you can successfully take it on vacation. In addition, the 800 mAh battery provides up to 60 minutes of operation, and the charging time is 120 minutes. You will renew the device's energy by connecting it with a cable to a powerbank, laptop or mains charger.
