

Cold air curling iron and straightener InFace (black)

Cold air curling iron and straightener InFace (black)

Ref: 6971308401179

InFace cold air curling iron/straightener (black)

Use the ZH-07F to both curl and straighten your hair. The inFace curling iron-straightener is equipped with movable 3D plates that heat up in no time (15s), and thanks to its clever design, it won't damage your hair. In addition, it offers 5-position temperature control, so you'll be able to adjust its performance to suit your needs.

5-stage temperature control

Adjust the operation of the curling iron-straightener to your own needs. The device offers 5 temperature levels, so it will work for different hair types. The lowest temperature (120°C) will be suitable for fine hair, and 150°C for damaged hair. For normal hair, 170°C will work well. On the other hand, for hair that is difficult to style, choose a temperature of 190°C. If your hair is thick, set the highest value - 210°C. What's more, the device will remember the last used temperature step.

Beautiful hairstyle for longer

The inFace curling iron is equipped with 3D ceramic plates, which do not cause a pulling sensation and leave hair shiny and smooth. In addition, the wide angle (15°) allows you to style more hair at once, saving you time. Enjoy a great hairstyle for up to 48 hours.

Thoughtful design

The inFace ZH-07F is equipped with a powerful motor that operates at 14,000 rpm. What's more, it offers a blast of air that simultaneously protects hair from drying and disperses heat around the hair, which speeds up styling and fixes the style. What's more, the PTC technology makes the device heat up in as little as 15 seconds and does not damage the hair.

User-friendly

The inFace ZH-07F is designed to be comfortable to use. The PPS plastic head tip is heat resistant, so you can use the device with two hands without worrying about getting burned. The swivel cord increases freedom of movement, while the non-slip handle and ergonomic design ensure comfort. What's more, the product will automatically shut off after 60 minutes for safety purposes.
