Screwdriver precision set JIMI Home JM-GNT56, 56 pcs

JIMI Home JM-GNT56 precision screwdriver set, 56 items

Opt for top quality and make your job easier! JIMI Home's JM-GNT56 set includes 42 assorted precision screwdrivers, which are made of durable S2 steel alloy. All items are housed in a convenient case for easy transportation.

High quality workmanship

Each bit was created from a special S2 steel alloy, which is characterized by durability. The phosphated surface provides effective protection against corrosion. In addition, all tips have been properly laser-marked for easy identification.

Magnetic solution

In the set you will find a special handle that will make your work easier. It was made of aluminum alloy, so it is not only durable, but also extremely lightweight. The built-in strong magnet allows you to easily mount the bits, which sit firmly and stably in the holder. In addition, magnetic adsorption makes the bits attract small screws.

Works well in any situation

The JM-GNT56 set includes up to 42 different bits, 3 types of stainless steel tweezers, 2 handles, a SIM card extractor key, a metal undermount tool, a magnetizer and demagnetizer, and a sturdy case. The set of screwdrivers will be perfect, for example, when repairing

a phone, maintaining models or other devices.

Innovative case

Now you will be able to have a set of screwdrivers always at hand! All the elements have been placed in a practical case that rotates 360°. The case was made of durable and corrosion-resistant material. What's more, it has been additionally coated with anodes, which prevents accidental slipping from a sweaty hand.

Included:
