Mcdodo TWS Earbuds Lite Wireless Headphones HP-8031

Conveniently listen to music at home, at work or while traveling while enjoying excellent sound quality. The TWS Mcdodo HP-8031 earbuds will surprise you with their clear, natural sound and a runtime of up to 25 hours (with charging case). They are also distinguished by a lightweight, ergonomic design and IP54 water resistance. What's more, Bluetooth 5.0 connectivity guarantees stable transmission, and built-in noise-canceling microphones allow you to talk freely on the phone.

Long operating time

Don't worry that the earbuds will drain too quickly and prevent you from listening to your favorite songs or podcasts. Fully charged Earbuds Lite HP-8031 can play music for about 5 hours, and the included case allows you to extend that time to about 25 hours. This even translates into a full day of use! Charging the earbuds won't take long - about 1.5 hours is enough.

Reliable wireless connection

Enjoy the fast and stable wireless connection provided by Bluetooth 5.0 technology. Range of up to 10m, wide compatibility, greater resistance to interference - these are just some of the advantages! You can easily pair the earbuds with most Android, iOS or Windows devices, and use each separately or both at the same time. In addition, once paired Earbuds Lite HP-8031 automatically connect every next time.

Light as a feather

Listen to music for as long as you want without worrying about discomfort. Mcdodo headphones weigh only 4g - you won't even feel that you have them in your ears. What's more, they fit perfectly in the ear canal and won't fall out - even when you exercise or just move a lot. Earbuds Lite HP-8031 are also incredibly comfortable and IP54 waterproof - they are not intimidated by drops of sweat or rain! The earbuds are also equipped with convenient to use touch panels.
