The case is made of durable PC material, thanks to which it will not yellow after prolonged use and will retain its original color. In addition, the reinforced corners of the case effectively protect the edges of the phone during falls. What's more, the edges around the screen and camera have been raised, so you can put your phone on a table or desk without worry.

Perfect fit for your smartphone

The case is precisely fitted to the phone's case - it does not hinder access to the buttons, speakers or camera. You can easily keep it clean, just wipe it with a cloth to make it transparent again. In addition, the transparent case with black edges will highlight the original color of your phone.
