

### Wall Charger Acefast A17, 65W GaN + kabel USB-C (black)

Wall Charger Acefast A17, 65W GaN + kabel USB-C (black)

Ref: 6974316281085

Acefast A17 65 W GaN Smart Hub mains charger (black)

The Acefast A17 network charger allows you to charge your devices with a maximum power of 65 watts. It supports multiple fast charging standards and allows data transmission at 10 Gb. It has 3 built-in ports - HDMI, USB-C and USB-A. It is made with GaN technology and guarantees a high level of safety during use. In addition, a 1.8-meter USB-C/USB-C cable has been included.

A range of possibilities

The device is equipped with 3 practical ports that will prove useful in almost any situation. The USB-C port will be perfect for fast charging of devices, as well as instant data transfer between devices. In turn, USB-A, in addition to charging, can be used to connect a mouse, keyboard or flash drive. The HDMI port allows you to send video to a TV screen.

Fast Charging Technology

Save your precious time! The Acefast AC charger allows fast charging protocols Power Delivery, Quick Charge 3.0, AFC and FCP. So you can charge your smartphone or tablet in no time. In addition, it has two built-in USB ports, so you can charge 2 devices simultaneously. In addition, you'll find a 1.8-meter USB-C cable included, so you'll be free to use your phone while charging.

Instant data transfer

The charger allows you to transfer data between devices at speeds as high as 10 Gb - effortlessly transfer large files in no time. Enjoy the dizzying speed and transfer your favorite photos or videos from your phone to your computer!

#### Compatible with many devices

The product is distinguished by its wide compatibility - you can easily charge most popular devices with its help. You can easily supply energy to, among others, smartphone or tablet with Android, iPhone, laptops of various brands or even Nintendo Switch console.

#### Safe use

The charger's components have been made with innovative GaN technology, thanks to which the device guarantees even more efficient operation and consumes less energy. The charger has been effectively protected against overload, overheating, overcharging, overvoltage and electrostatic discharge.
